Scott,

I have directly contacted Synquest and asked for a quote to synthesize Nafion BP1 and BP2. In addition I asked if they had or could synthesize each analyte in Table 2 from our report. After an initial email response they still have not respond to my request. A recent C&E N article about GenX in the Cape Fear river asked for those who can synthesize get in touch with us. I have had two recent response I have not yet been able to get back to.

The contact at Synquest was Frank Waters. Please do duplicate my efforts. I have made no progress.

Mark

Mark,

What routes have you explored? I'm looking for a source and don't want to duplicate your efforts.

Scott

Thanks. Our attorneys have discussed with Chemours to get them to provide it to you.

I have not yet been able to get this compound as a standard.

Subject: Lab standard

Want to check on the ability to get a lab standard for PFMOAA, which was in the EPA NERL non-targeted analysis.

PFMOAA (2,2-difluoro-2-(trifluoromethoxy)acetic acid) C₃H₅F₅O₃ CAS no.674-13-5, DA = 179.9846

Mark – have you discussed getting this from the Chemours chemist, or know if it is one we can purchase for Athens to use?

Thank you,
linda
